

<p>Carlo Ambrogio Borgonovo founded, the Borgonovo Joinery in Perticato, 1000 sqm workshop for custom furniture.</p>	<p>First large project in Italy: the supply of partition systems for Milano2 and Milano3 residential neighborhoods</p>	<p>The company changed name into BBF and moved to Giussano in a larger facility to match rising inquiries and needs for bigger business numbers. BBF started to produce items and crafted goods for Herman Miller and Knoll Int.</p>	<p>Technical office integration with production and process began to be controlled by CAD programs. Cooperation with international developers and architects enlarges to North Africa and USA</p>	<p>BBF starts cooperation with Vitra . UNIT2, second production facility is inaugurated to increase the production capability. More investments in state of the art technology made BBF the reliable partner for developers</p>
<p>1950</p>	<p>1980</p>	<p>1988</p>	<p>2008</p>	<p>2015</p>
<p>1976</p>	<p>1986</p>	<p>2003</p>	<p>2011</p>	<p>2018</p>
<p>The early death of Carlo Ambrogio push the sons Livio and Giancarlo to take over the management of the company. Both are young, but behind the scenes the mother Virginia is lighting the way on.</p>	<p>Livio and Giancarlo welcome their sister Nicoletta in the company: they will share responsibilities following personal inclinations into sales, production and administration. It was borne a new company named BI&FFE, Borgonovo Fratelli (Brothers).</p>	<p>The company enlarged the business to hospitality project, supplying furniture for hotels and residential units in Italy and Europe.</p>	<p>BBF is the first company in Italy to equip the edging process of panels with IMA laser edge banding technology. The business field enlarge to residential projects and libraries. It was born BBF Laboratory</p>	<p>Opportunities and projects worldwide require investments in machinery and a new production plant where to locate assembling and logistic. A new production line is added for small production lot.</p>

We are located in the worldwide renowned district of the the high-end furniture industry.

BBF LAB is committed to scout and develop the best material and technical solution to match every design requirements. Our engineers and designer work for the excellence, side by side with our networks of partner companies and suppliers. Expertise, experience and innovation deliver the mandatory support that makes every project a success.

We are committed to deliver highest quality standards throughout verified processes only with materials design to comply with the highest requirements

The bitterness of poor quality
remains long after the sweetness of
low price is forgotten.

— Benjamin Franklin

You will rely on a service that covers full project development, designed to achieve excellent results in terms of both goals and budget.

From your idea, we are able to develop the order for production starting from design and shop drawings through selection of materials, finishes, accessories, hardware for a perfect value engineering.

We deal with the product engineering, allowing option of implementing variations till just-in-time order.

STATE OF THE ART MACHINERIES FOR THE WOOD INDUSTRY

No doubt, the laser technology has established itself among the several edge-banding processes for panels, thanks to the laser edging process excellent results are achieved with clear quality improvement.

Through this innovative technique the edge application is no more carried out with glue, but with laser welding.

Last generation CNC workstations for drilling and reuttering processes. The ultimate machines grant maximum precision, absolute efficiency and extreme flexibility and make BBF able to supply both big-quantity and orders for the so-called “batch 1”. For the shaped panels BBF has a double workstation system, able to router and to edge at the same time.

Duplex in-line X-ray scanner. We carry out an automatic end-of-line control through scanner, in order to identify possible discrepancies between final drawing and processing. This is a further check of the accuracy of our work.

There's a point where
machineries and
technologies can't get to.
There is where our
artisans and
woodworkers address
their knowledge and
expertise.

We feed our people with
yearly updates and
training to maintain and
improve the highest
quality level and exceed
the expectations of our
clients worldwide.

We tag each item, ensuring the correct identification of every single package at the jobsite. Thanks to barcode scanner we make our customer sure that all the goods have been effectively delivered and each component can be easily identified for the final check

BBF is able to supply a customized packaging. We are aware of the fact that an appropriate packaging is the first step to avoid damages during transport and for this reason we pay the greatest attention to protect your products. From semi-finished components on pallets to the assembled product packed in carton boxes or shrink-wrapped we can offer the most suitable solution for every request.

We think that it's mandatory to use appropriate packing solution in order to protect each items from loading to delivery, ensuring the perfect conditions at final destination.

YOUR CREATIVITY BECOMES REALITY

Thanks to our extensive experience and our network of suppliers we can follow the requirements of every design and materials.
